JV Performance Tuning

Hosted by Carrillo Automotive

WHEN: August 24th, 2024
10:00 AM - (?)

WHERE: Carrillo Automotive Solutions
110 Werz Industrial Blvd
Newnan, GA 30263

SIGN-UP: FB Event Page to Schedule (Optional)

COST: Base \$799-
Unit price goes down as sales increase
FREE to hang out for the day

DETAILS:

We are very excited to announce that our friend and partner **Carrillo Automotive** will be hosting an event on August 23rd-25th and has invited **JV Performance** to be on-site to tune any N vehicle! The more people we have the better group rate we will get. Financing is available.

JV Performance is a tuning powerhouse out of Puerto Rico. These will be CUSTOM tunes with the tuner on site.

The base price will be \$799 but if we get enough people that will come down!

There will be food trucks and music, and there is no requirement to get a tune, anyone is free to just come hang out.

News

From July

July focuses on the High-Pressure Fuel Pump (HPFP) recall. As many long-term N owners know, the HPFP is a known weak point on N cars, and many members took it upon themselves to remedy the issue by replacing it with the HPFP from the Sonata 2.0T.

This recall means you may schedule an appointment with Hyundai and, if your pump has shown signs of inadequacy, they will replace it for free. It is unknown at this point if “replacement” means just another stock N pump or the “upgraded” Sonata Pump.

Carmax claims the recall is open to

2019-22 (all) Veloster N,

2022-23 (all) Kona N, and

2022-23 Elantra N.

Notably, the 2024 Elantra N is missing from the list, even though it comes equipped with the same pump as the rest of the N's. It is not yet known why.

The official recall statement from Hyundai for affected VINs through [Hyundai's recall checker](#) is as follows:

Campaign #	Recall 262
NHTSA Recall #	24V528000
Description	HYUNDAI/GENESIS HAS FILED RECALL CAMPAIGN 262/023G TO ADDRESS A CONDITION INVOLVING THE HIGH-PRESSURE FUEL PUMP ASSEMBLIES IN CERTAIN HYUNDAI AND GENESIS VEHICLES PRODUCED FOR SALE IN THE U.S. AND CANADA.
Safety Risk	THE FUEL CONTROL VALVE ("FCV") IN THE HIGH-PRESSURE FUEL PUMP ("HPFP") ASSEMBLIES EQUIPPED IN THE SUBJECT VEHICLES COULD ALLOW EXCESS FUEL TO ENTER THE FUEL PUMP DUE TO GRADUAL WEAR OF THE FCV PLUNGER. AN AIR/FUEL MIXTURE THAT RUNS TOO "RICH" MAY RESULT IN A REDUCTION OR LOSS OF MOTIVE POWER AT LOW SPEEDS, INCREASING THE RISK OF A CRASH.
Remedy	ALL OWNERS OF THE SUBJECT VEHICLES WILL BE NOTIFIED BY FIRST CLASS MAIL WITH INSTRUCTIONS TO BRING THEIR VEHICLES TO A HYUNDAI DEALER OR GENESIS RETAILER FOR AN ENGINE ECM SOFTWARE REVISION. IN THE EVENT OF AN EXISTING MALFUNCTION INDICATOR LAMP (MIL) ON CONDITION, THE HIGH-PRESSURE FUEL PUMP WILL ALSO BE REPLACED. THIS REMEDY WILL BE OFFERED AT NO COST TO OWNERS FOR ALL AFFECTED VEHICLES, REGARDLESS OF WHETHER THE AFFECTED VEHICLES ARE STILL COVERED UNDER HYUNDAI/GENESIS NEW VEHICLE LIMITED WARRANTY. ADDITIONALLY, HYUNDAI/GENESIS WILL PROVIDE OWNERS OF AFFECTED VEHICLES REIMBURSEMENT FOR OUT-OF-POCKET EXPENSES INCURRED TO OBTAIN A REMEDY FOR THE RECALL CONDITION IN ACCORDANCE WITH THE REIMBURSEMENT PLAN SUBMITTED TO NHTSA ON FEBRUARY 22, 2024.
